

# Update from Asia and Japan

## ---- Latest report on the major XBRL projects in the region

November, 2014  
Yoshiaki Wada  
Chair for XBRL Asia Round Table  
Senior Manager, NTT Data Corporation

# XBRL members in Asia and Oceania

## 5 Jurisdictions and 2 Direct Members

In addition to above countries, Malaysia, Taiwan, Thailand are also implementing XBRL

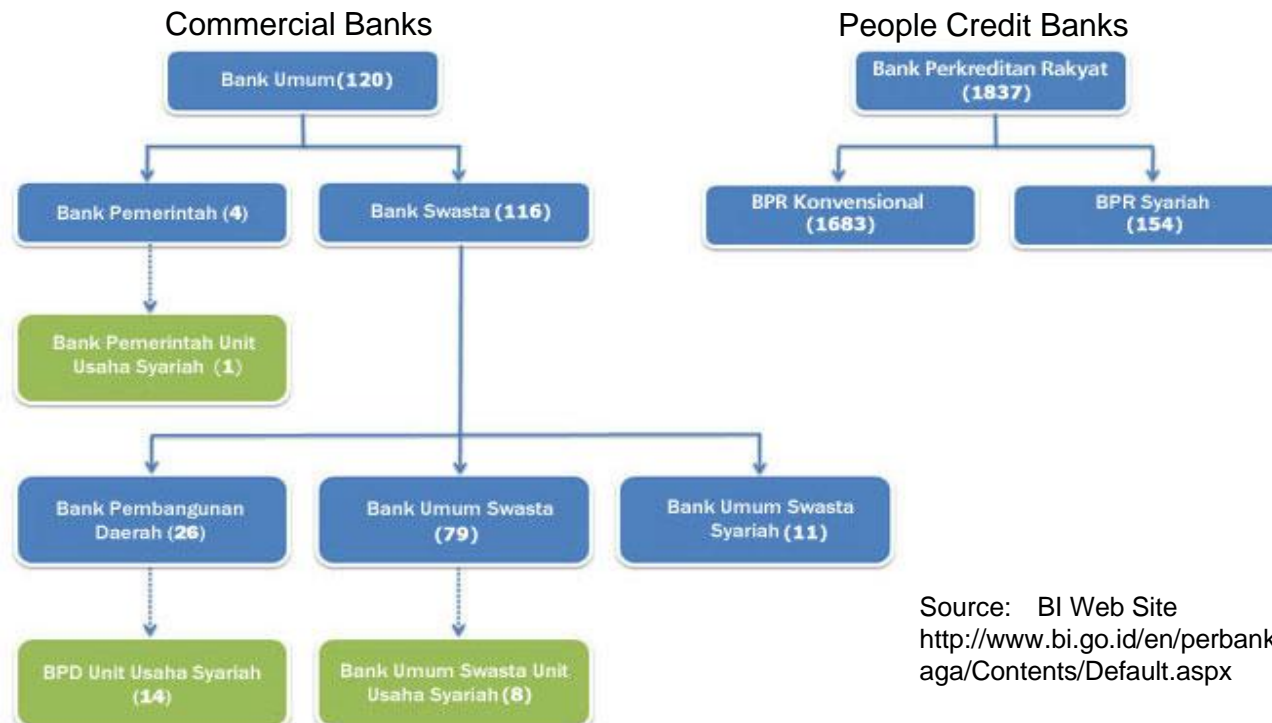

## Update from Indonesia, Singapore and Korea

# Bank Indonesia (1)

## Project Outline

- ◆ Project name: Monetary and Financial System Report
- ◆ Users
  - Data Reporting Users : About 150 Financial Institutions
  - Data consumers/users : Monetary Authority, Financial Stability and Payment System Department

### Financial Institutions in Indonesia

# Bank Indonesia (2)

- ◆ Project goal: Building a Single Reporting Platform
- ◆ Time line: 2013 - 2016
- ◆ Project Scheme:
  - System integration of 11 reporting systems into single platform
- ◆ Frequency of report: Daily, Weekly, Monthly and Annually
- ◆ Technical feature: Tuple, Dimension, Formula etc.
- ◆ Current step: Implementing Risk Report, similar to COREP
- ◆ Next step: Activity Report (Derivatives, Marketable Securities, etc.)

## Project Outline

- ◆ Project name: BizFin<sup>x</sup> (Business Financials in XBRL)
- ◆ Users
  - Data Reporting Users : Singapore incorporated companies (unlimited or limited by shares) which are required to file their financial statements with ACRA
  - Data consumers/users :
    - a) Public has access to information products (including XBRL data) which is available from ACRA's filing system;
    - b) 3<sup>rd</sup> party Information Service Providers subscribe to data services from ACRA and package the data (including XBRL data) for sale to the public;
    - c) Other Singapore government agencies are also subscribers to XBRL data and customize them for their own purpose

- ◆ Project goal:
  - Enhance the XBRL filing environment for local companies in Singapore
  - Increase the depth and breadth of XBRL data for consumption to promote better decision making, transparency and accountability

◆ Time line: BizFin<sup>x</sup> filing system commenced on Nov 2011

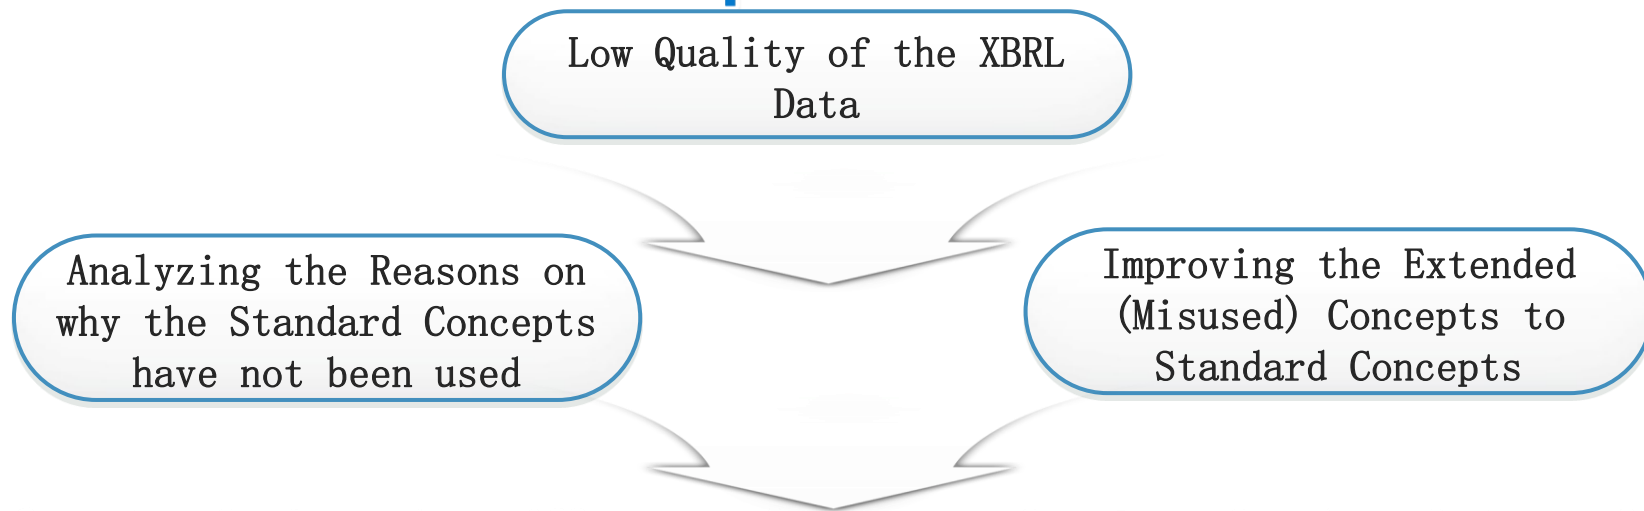

| Major Milestone  |                    |
|--|--------------------|
| Event  | Date               |
| Needs requirements study   | Jan-Apr 2012       |
| Public consultation for revised XBRL filing requirements and taxonomy                        | May-Jun 2012       |
| Focus groups and public consultation on usability of BizFin <sup>x</sup> preparation tool    | Jan-Apr 2013       |
| Release of Preparation tool with the finalized taxonomy and revised XBRL filing requirements | Aug 2013           |
| Launch of online BizFin <sup>x</sup> portal for submission                                   | Mar 2014           |
| Launch of Intranet Management System   | Nov 2014 (Planned) |

- ◆ Project Scheme:
  - Creating a system to receive Annual Return filing which includes XBRL financial statements and other information such as shareholder information, company officers, company address, etc.
- ◆ Technical feature: Specifications used in the ACRA Taxonomy 2013:
  - a) XBRL Specification 2.1 - Errata corrected edition released on 2012-01-25
  - b) Dimensions 1.0 – Sept.18, 2006 with errata corrections to Jan. 25, 2012
  - c) FRTA Recommendation dated 2005-04-25
  - d) Formula Specification 1.0 - 2009 – 2011
- ◆ Current step:
  - All public-facing functions for the BizFin<sup>x</sup> project, including the offline preparation tool and the internet BizFin<sup>x</sup> portal have been launched. Companies have been filing with ACRA since 3 March 2014.
  - BizFin<sup>x</sup> intranet portal for ACRA's internal use is shortly launched.
- ◆ Next step: Promotion of the XBRL data consumption

## Current XBRL Environment in Korea

### Extended Concepts are used instead of Standard Concepts from the DART\*

**After Analysing the Difference between the Standard and Extended Concepts from the XBRL Data and the DART Taxonomy**

**→ The companies will then be guided to use the Standard Concepts and thus the XBRL Data will be of a better quality**

\* DART : Data analysis, Retrieval and Transfer System of the FSS

\* FSS : Financial Supervisory Service

### DART Taxonomy Update

- The DART Taxonomy is updated whenever there is a change in the IFRS Taxonomy

### Improvement in the Taxonomy

- The commonly used concepts by listed companies should be analyzed
- A review of those concepts should also be done to make sure that they are standard concepts

### Validation of XBRL Data

- XBRL Data of listed companies will be checked to identify any errors

### Conversion of the XBRL Data

- There are about 1,800 listed companies here in Korea
- If their XBRL Data, (A), include any misused concepts, we will correct them to create an improved XBRL Data, (A')
- The (A') will then be given to the respective listed companies to improve the quality of (A)

**1. Expansion of range of Risk Data for enhanced financial monitoring**

**2. Improvement of usability of the system and effort for the expansion of disclosed data consumption**

**3. Improvement of reported data quality**

**4. Trial for XBRL based Non-Financial Data Reporting**

## Update from Japan ---- Environment Report

## Increase in Environment Oriented Investment, in the World

Especially, ESG (Environment, Social, Governance) Investment is becoming major in Europe

However, ESG Investment is still minor in Japan !

Amount of ESG investment by region

Ratio of ESG investment in the region

Enhancement of ESG oriented Investment is an urgent issue in Japan

MoE Japan decided to build Environment Report Platform, with XBRL

Source: Ministry of Environment, Japan

## FY2013

### Platform Building

- Upload, Revise, Disclose
- Data search, View
- Download(CSV,XBRL)
- Taxonomy building

As the first project year, built a minimum platform which is necessary for the evaluation of basic functions for XBRL based disclosure system.

## FY2014

### Facility Upgrading

- Revision of Report Form
- Review of KPI
- English Translation
- Review of system operation
  - Data search
  - Graphic data handling
- Operation manual review
- Planning of data linkage to the other systems

Based upon the review of FY2013 POC, upgrade the system aiming at a better usability and add new analysis functions for data users, especially FSIs.

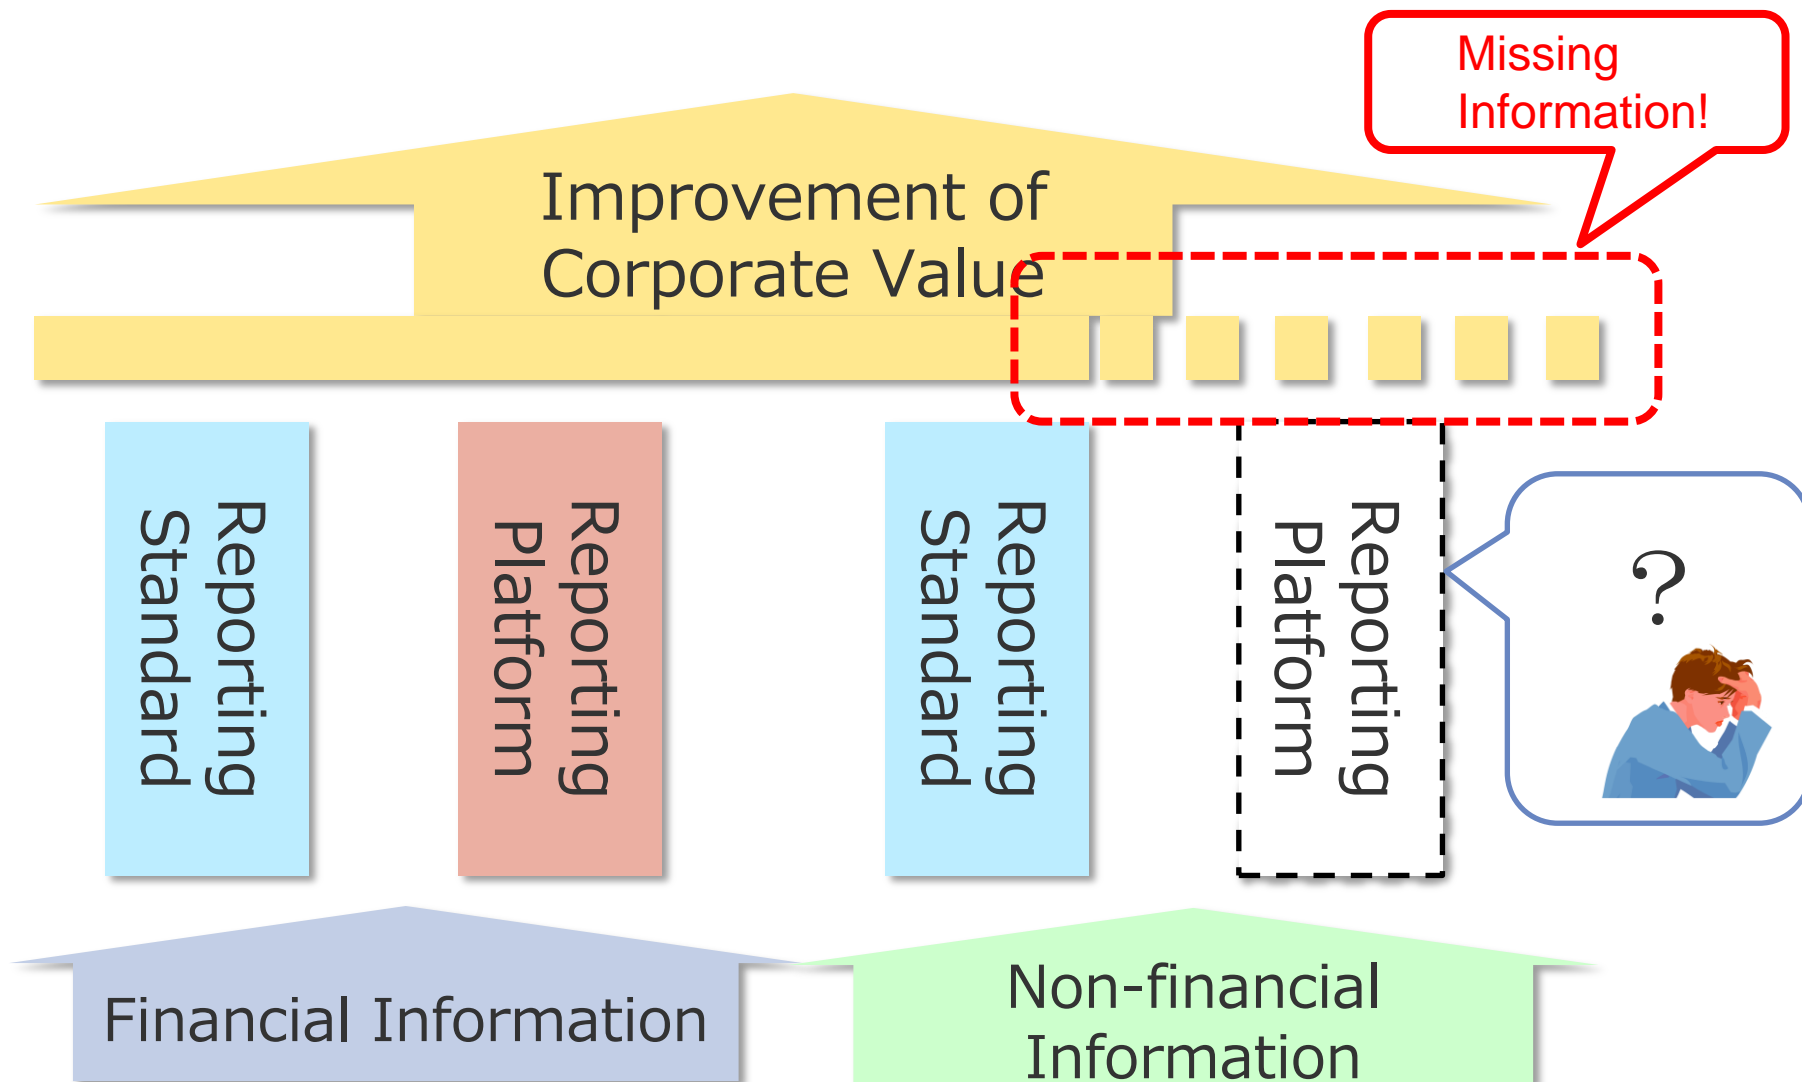

## FY2015

### Further Facility Upgrading

- System upgrading
- Building a data linkage to the other systems
- Data search function Upgrading
- Upgrading taxonomy

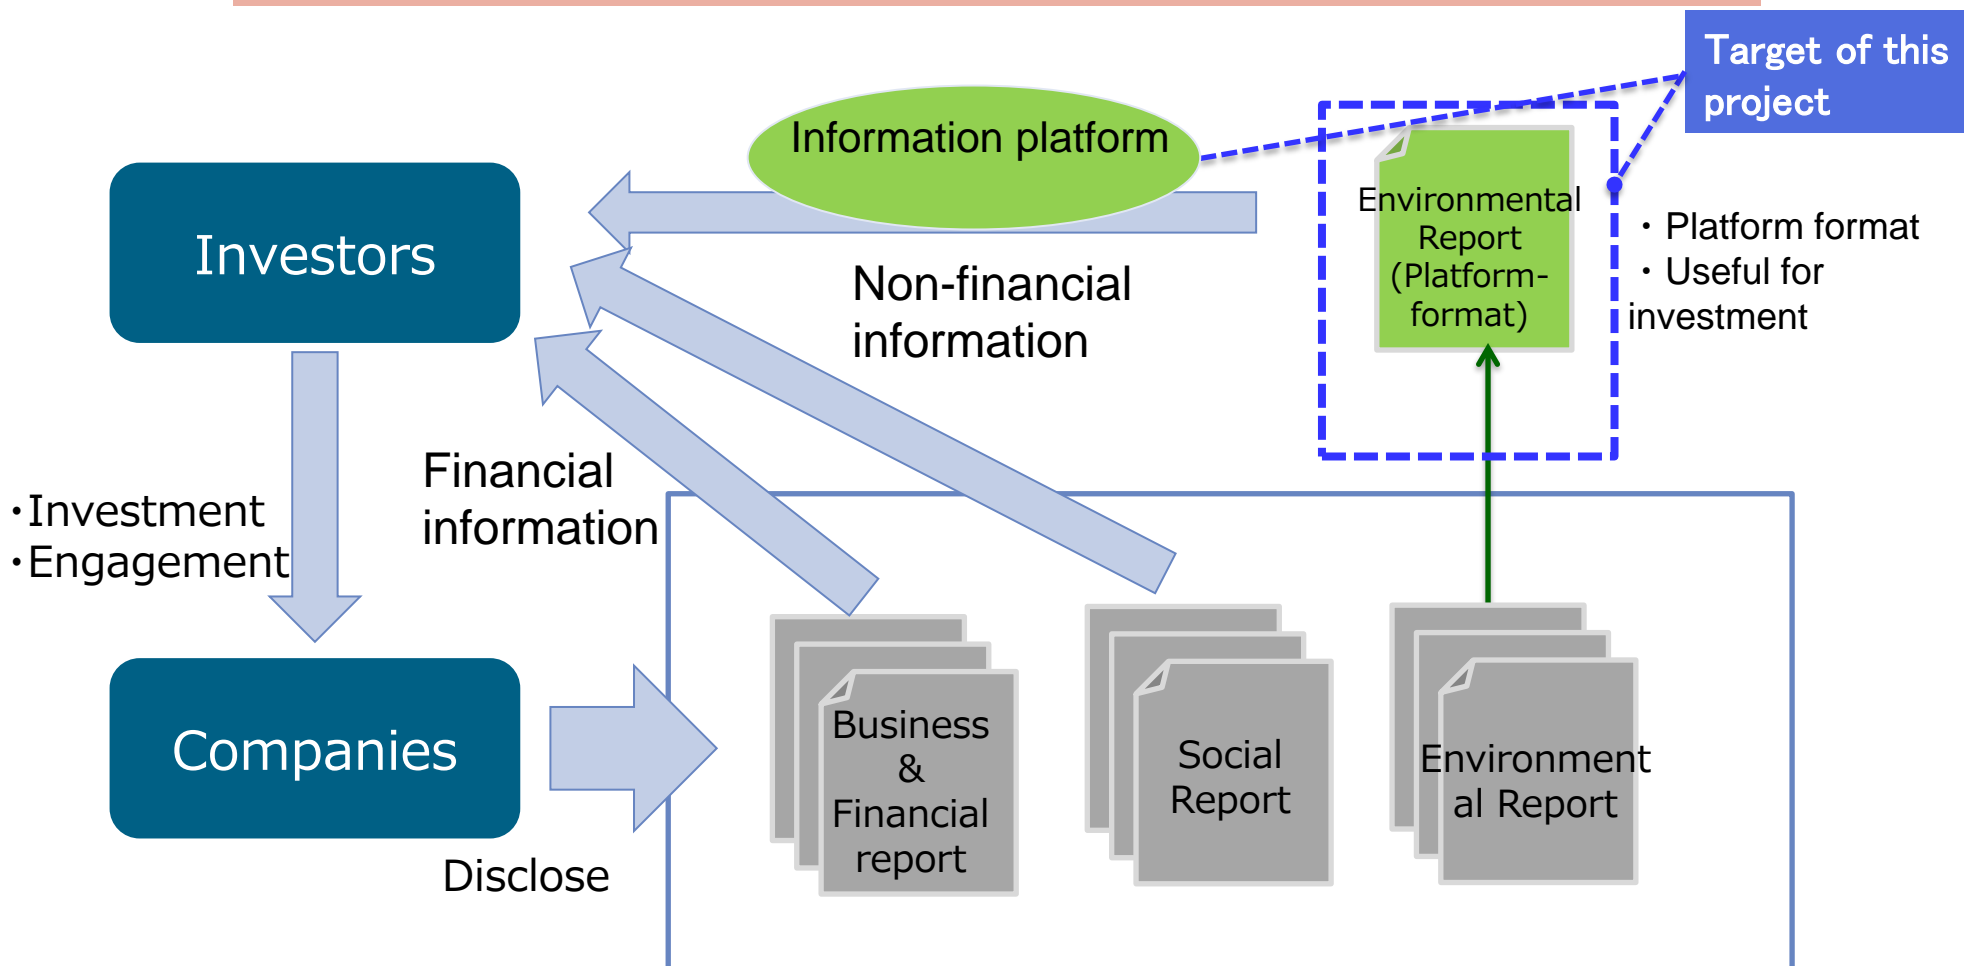

Next step  
for building  
live system

Based upon the review of FY2014 POC, upgrade the functions of the system and create data links to other information systems.

## Project Scope

Create a new Reporting Flow for Environment Report

How to make a efficient XBRL format for Non-numeric Information ?

In 2013, XBRL-based disclosure platform was built and the first stage of POC for environmental information disclosure had started.

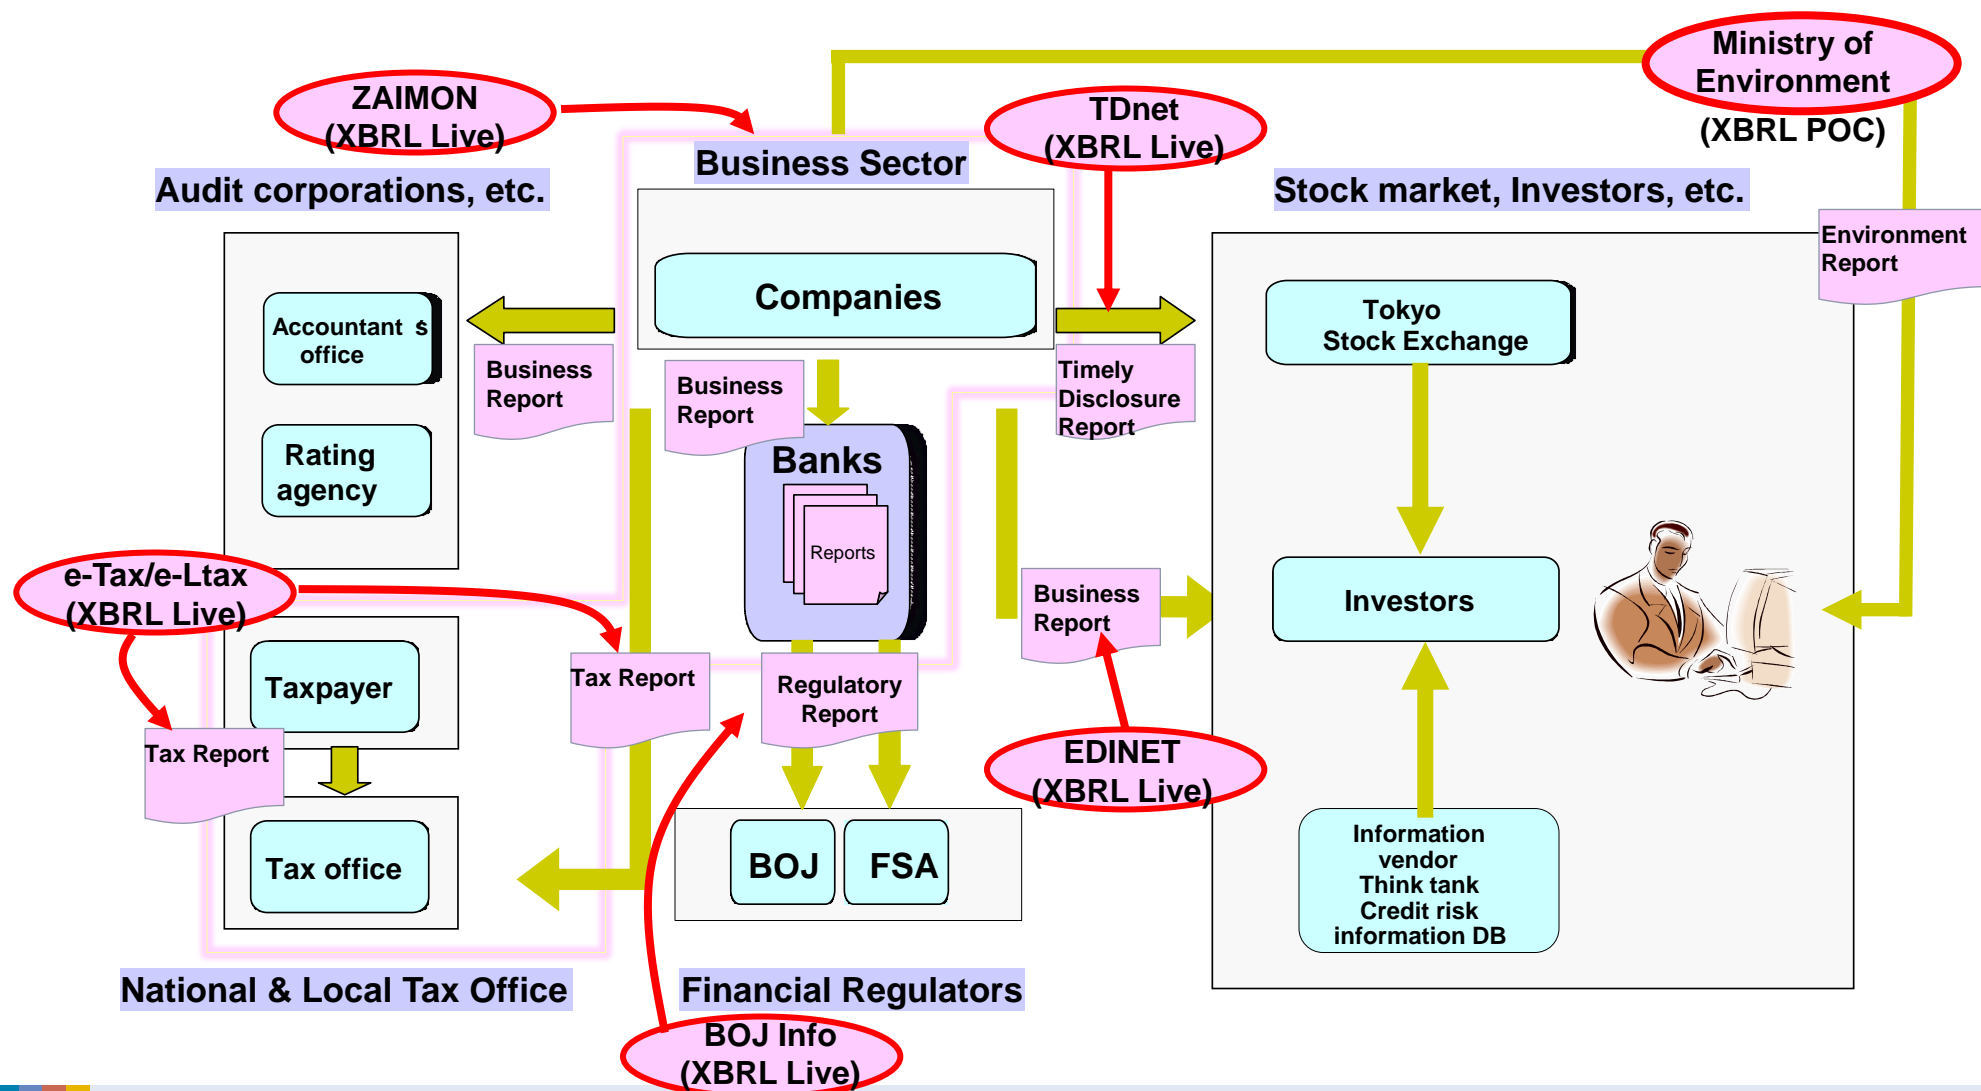

By mapping of CDP Climate Change report data to Environment Report,  
Reduce the reporting burden with filers

During Jan. to March 2015, increased numbers of participants are expected to join the second POC.

|             | POC in 2013  | POC in 2014   |
|-------------|--------------|---------------|
| Filing Side | 60 Companies | 200 Companies |
| User Side   | 12 Companies | 20 Companies  |

XBRL is widely used in Corporate Disclosure System, Tax Reporting and Central Bank's Monitoring System. Secondary use of XBRL data is also expanding for loan assessment by commercial banks.
