

Uniform Presentation

Paul Snijders

CEO Semansys Technologies
Vz Chair XBRL Netherlands

Topics

- ┆ Introduction
- ┆ Uniform Presentation
- ┆ Audience

Introduction

- ┆ Financial Statements are in XML/XBRL format
- ┆ XBRL is not human readable
- ┆ Auditor will have to provide assurance on XBRL
- ┆ The 'True and fair' view is crucial

Why do we need it

- └ XBRL is only format for submission of statements (NO paper)
- └ Regulations mandates audits for large corporates
- └ Dutch Institute of Accountants, Central Bank and SBR demand audits on XBRL filings
- └ Preparer AND auditor AND receiver need always same view

Concept

```
<KOSDAQ-pfs:TotalInterestRevenuesinNOR contextRef="context-1999" unitRef="Units-Monetary" decimals="0">37354505</KOSDAQ-pfs:TotalInterestRevenuesinNOR>
<KOSDAQ-pfs:TotalInterestExpensesinNOE contextRef="context-2002" unitRef="Units-Monetary" decimals="0">464977058</KOSDAQ-pfs:TotalInterestExpensesinNOE>
<KOSDAQ-pfs:TotalInterestExpensesinNOE contextRef="context-2001" unitRef="Units-Monetary" decimals="0">1119467528</KOSDAQ-pfs:TotalInterestExpensesinNOE>
<KOSDAQ-pfs:TotalInterestExpensesinNOE contextRef="context-1999" unitRef="Units-Monetary" decimals="0">876266073</KOSDAQ-pfs:TotalInterestExpensesinNOE>
<KOSDAQ-pfs:TotalInterestExpensesinNOE contextRef="context-2000" unitRef="Units-Monetary" decimals="0">944009040</KOSDAQ-pfs:TotalInterestExpensesinNOE>
<KOSDAQ-pfs:TotalLoss contextRef="context-1999" unitRef="Units-Monetary" decimals="0">0</KOSDAQ-pfs:TotalLoss>
<KOSDAQ-pfs:TotalOtherExtraordinaryLossesinEL contextRef="context-2000" unitRef="Units-Monetary" decimals="0">0</KOSDAQ-pfs:TotalOtherExtraordinaryLossesinEL>
<KOSDAQ-pfs:TotalOtherExtraordinaryLossesinEL contextRef="context-1999" unitRef="Units-Monetary" decimals="0">126001701</KOSDAQ-pfs:TotalOtherExtraordinaryLossesinEL>
<KOSDAQ-pfs:RetainedEarningsBeforeAppropriation contextRef="context-2000" unitRef="Units-Monetary" decimals="0">5624492688</KOSDAQ-pfs:RetainedEarningsBeforeAppropriation>
<KOSDAQ-pfs:RetainedEarningsBeforeAppropriation contextRef="context-1999" unitRef="Units-Monetary" decimals="0">5624492688</KOSDAQ-pfs:RetainedEarningsBeforeAppropriation>
```

XBRL
eXtensible Business Reporting Language

How to ?

1. Uniform Presentation

2. 'True and Fair' View

3. For Gaap and any other

4. One size fit's all

Criteria for UP

- ┆ Works for ANY instance and ANY taxonomy
- ┆ Only based on XBRL 'Recommended' specifications
- ┆ Renders the whole truth and nothing but the truth
 - ┆ ALL XBRL and XML data
- ┆ Can be applied by any application

UPR's : Uniform Presentation Rules

UPR's

- † Generic rules
- † Tables
- † Presentation
- † Display groups
- † Headers
- † Period Sets
- † Other XBRL data
- † XML data
- † Scaling
- † Localisation

| | | |
|------|--------|---|
| UP 1 | | The XBRL instance MUST be valid and based on a XBRL taxonomy that MUST be valid . The UP will not perform any validation. |
| UP 2 | UP 6 | The UP MUST use the TLB when discovered in the DTS. |
| | UP 10 | The UP MUST follow the Presentation links as discovered in the DTS. |
| UP 3 | UP 11 | The UP MUST follow the determination and decision process for Display Groups as described. |
| UP 4 | UP 12 | The UP MUST not have duplicate Display Groups . |
| | UP 13 | The UP MUST not have empty Display Groups . |
| | UP 14 | The Display Group header MAY report the default values for entity, unit, dimension/member or segment or scenario and scaling. |
| | UP 103 | The UP MUST render 'nil' and empty value facts that have been reported. |

Approach

- └ Introduction of **Display groups**
 - └ 1st: Based on Table Linkbase
 - └ 2ND Based on Presentation linkbases
- └ No other display structures (Definition/Calculation)
- └ All other data is : non presentable data
- └ ALL other XML data will also be shown

Approach (2)

- └ No changes to Table or Presentation layouts allowed
- └ No 'Own' layouts,
- └ MUST follow order from UP

Display group ordering

- A. Display Group Report Information
- B. Display Groups per entity
 - a) Display Groups for all tables
 - b) Display Groups for all presentation links
 - 1) Period sets (begin, duration, end, recent period first)

Display group ordering (2)

- C. Display Group Footnotes (related to >1 fact)
- D. Display Group non presentable facts
- E. Display Group Other XBRL Data
 - a) Display not used Entry points, Contexts, Units
- F. Display Group XML data

Other topics

- ┆ Language based on instance (XML:Lang)
- ┆ Label priority (Standard, Preferred, ..)
- ┆ Localization allowed (Decimal separator)
- ┆ Scaling allowed (based on XBRL decimal attribute)

Apply Uniform Presentation

- └ Identical result from any application
- └ One view for all filings
- └ A 'must-have' basis for any internal/external audit process
- └ Regulators can have appended FR-UP, Applied UP for domain

Audience

Controllers, Auditors, Accountants

Preparers, Financial staff

Developers, IT staff, Testers

Conclusion

- † XBRL is very technical format
- † Audit and Control is crucial for all
- † Uniform Presentation is key for audits
- † Works anywhere
